VAL-CO SYSTEM DISCLAIMER

Recommendations, opinions, or advice given by Val-Co regarding equipment, systems, or installation shall be accepted at the user's own discretion and shall not constitute any warranty or guarantee of such products or their performance. Val-Co assumes no obligation or liability on account of any recommendation, opinions or advice as to the choice, installation, or use of products.

Before installation is made on any product or system, the user has a responsibility to research and comply with all federal, state, and local codes which may apply to the location and installation.

VAL-CO PRODUCT DISCLAIMER

Val-Co products are designed and manufactured to provide reliable performance. Even reliable products may experience occasional failures, due to variance of installation, environment, and the recognized life cycle of a product. Due to the possibility of failure, the user should provide adequate backup systems and an alarm or acknowledge willingness to accept the risk of loss.

HOW TO ORDER A FILL SYSTEM

TO ORDER A VAL-CO FLEXIBLE AUGER FILL SYSTEM:

- ▶ Refer to system notes on page 04-03 to determine which system best meets your needs.
- ▶ Determine plastic upper boot and lower boot required and order from pages 04-04 thru 04-05.
- ▶ Refer to system sketches on page 04-27 thru 04-30 and then to the appropriate corresponding charts on pages 04-31 thru 04-50. Using your selected chart as a guideline, select the line components required for your system. Select & order components as indicated from the listings on pages 04-06 thru 04-21.
- ▶ Additional savings are available if you order PVC tubes and Flexible Auger in bulk quantities shown on pages 04-08 and 04-13.
- ▶ Determine number of drop outlets needed and order from pages 04-14 & 04-16 along with any downspout tubes and/or accessories needed.
- ▶ Select and order feed level control switch from page 04-26.
- ▶ Contact your Val-Co sales representative or Customer Service for assistance if needed.

FLEXIBLE AUGER FEED DELIVERY SYSTEMS

MODEL 720 2.25" (55mm) FLEXIBLE AUGER FILL SYSTEMS

Used to convey dry ground feed and crumble type mash - maximum moisture content 18%. Maximum particle size 1/8" diameter x 1/2" long. Do not use for large pellets or shelled corn. PVC tubes are 2.25" (55mm) outside diameter; flexible auger is 1.52" outside diameter. Approximate feed delivery rate is 15 lbs. per minute or 900 lbs. per hour based on 40 lbs./cubic foot feed density and 359 rpm drive unit.

MODEL 725 "PELLET" 3" (75mm) FLEXIBLE AUGER FILL SYSTEMS

Used to convey dry ground feed and crumble type mash - maximum moisture content 18%. Maximum particle size 1/8" diameter x 1/2" long. System is recommended for pellets or shelled corn. PVC tubes are 3" (75mm) outside diameter; flexible auger is 2.25" outside diameter. Approximate feed delivery rate is 35 lbs. per minute or 2100 lbs. per hour based on 40 lbs./cubic foot feed density and 359 rpm drive unit.

MODEL 730 3" (75mm) FLEXIBLE AUGER FILL SYSTEMS

Used to convey dry ground feed and crumble type mash - maximum moisture content 18%. Maximum particle size 1/8" diameter x 1/2" long. Do not use for large pellets or shelled corn. PVC tubes are 3" (75mm) outside diameter; flexible auger is 2.38" outside diameter. Approximate feed delivery rate is 50 lbs. per minute or 3000 lbs. per hour based on 40 lbs./cubic foot feed density and 359 rpm drive unit.

MODEL 735 HV 3.5" (90mm) FLEXIBLE AUGER FILL SYSTEMS

Used to convey dry ground feed and crumble type mash - maximum moisture content 18%. Maximum particle size 3/16" diameter x 1/2" long. Do not use for large pellets or shelled corn. PVC tubes are 3.5" (90mm) outside diameter; flexible auger is 2.71" outside diameter. Approximate feed delivery rate is 100 lbs. per minute or 6000 lbs. per hour based on 40 lbs./cubic foot feed density and 359 rpm drive unit.

MODEL 735 HM 3.5" (90mm) FLEXIBLE AUGER FILL SYSTEMS

Used to convey dry ground feed and crumble type mash - maximum moisture content 27%. Maximum particle size 3/8" diameter x 3/4" long. Do not use for large pellets or shelled corn. PVC tubes are 3.5" (90mm) outside diameter; flexible auger is 2.38" outside diameter. Approximate feed delivery rate is 50 lbs. per minute or 3000 lbs. per hour based on 40 lbs./cubic foot feed density and 359 rpm drive unit.

MODEL 740 HV 4.25" (108mm) FLEXIBLE AUGER FILL SYSTEMS

See Pages 04-51 & 04-52 for more detail

Used to convey dry ground feed and crumble type mash. Maximum particle size 3/16" diameter x 1/2" long.
PVC tubes are 4.5" (108mm) outside diameter; flexible auger is 3.55" outside diameter.

Approximate feed delivery rate is 220 lbs. per minute or 13,200 lbs. per hour based on 40 lbs./cubic foot feed density and 359 rpm drive unit.

SYSTEM NOTES

Auger boots, tube hangers, feed drop outlets, downspout tubes, feed control switches and other optional items are not included with the systems listed. Order these items separately.

Size your system to make the maximum operating time four hours per day. Some applications may require two flexible auger fill systems or possibly a 4" or 6" rigid auger system to meet the desired delivery rate.

A time clock or other control is recommended with all systems to prevent excess empty auger operation and other malfunctions.

Multiple bin pass-thru or tandem systems are recommended when extra feed storage or dual rations are required.

Extended length systems are complete with components to transfer from one feed line to another. These systems are available with direct drive power units only. RECOMMENDATION: Select a drive unit with a faster output rpm for the extended system than for the supply (entrance or pass-thru) system.

All systems are normally wired for 230V, 60HZ, 1 Phase operation. Additional motors (60HZ - 3 Phase, 50HZ - 1 Phase, & 50HZ - 3 Phase) are also available.

Standard drive unit (both v-belt and direct drive) is 359 rpm at 60HZ, 368 rpm at 50HZ operation. Alternate speeds (190, 250, & 441 rpm at 60HZ -- 159, 208, & 298 rpm at 50HZ) are also available.

IMPORTANT

WHEN USING ADDITIONAL FORMED TUBES ON A SYSTEM, FOR EACH ADDITIONAL 90° OF FORMED PVC TUBE ADDED TO A LINE DECREASE THE MAXIMUM LINE LENGTH FOR EACH MOTOR SIZE BY 30 FEET.

DISCHARGE HEADS

TO ORDER A COMPLETE DRIVE UNIT

DIRECT DRIVE UNIT

Order a steel (below) or poly (page 04-20 thru 04-22) discharge head kit and port & driver kit from page 04-23. Also order a direct drive motor & gearbox unit from pages 04-24 thru 04-25.

V-BELT DRIVE UNIT

Order a steel discharge head kit below (do NOT use poly head). Order v-belt drive unit (page 04-25) & a farm duty motor from catalog section 20.

Order port & driver kit from page 04-23.

STEEL DISCHARGE HEAD KITS

CATALOG #	ITEM DESCRIPTION	SHIP WEIGHT		LIST PRICE
		LBS.	KG.	
SINGLE PHASE	730531 Steel Discharge Head Kit - Relay Control - For use in 1PH applications only - Shipped in two cartons: (1) 730462 Basic Steel Head (1) 730501 Control Box - 1PH Motor Relay included	6.5	2.9	
	730731 Stainless Steel Discharge Head Kit - Relay Control	8.3	3.7	
	730532 Steel Discharge Head Kit - Relay Control & Proximity Sensor - For use in 1PH applications only - Shipped in three cartons: (1) 730462 Basic Steel Head (1) 730501 Control Box - 1PH Motor Relay included (1) 730465 Proximity Sensor	7.7	3.5	
	730732 Stainless Steel Discharge Head Kit - Relay Control & Prox. Sensor	8.7	3.9	
3-PHASE or SINGLE PHASE	730533 Steel Discharge Head Kit - Basic Control - For use in 1 or 3PH phase applications - Shipped in two cartons: (1) 730462 Basic Steel Head (1) 730505 Control Box - Motor Relay Not Included	6.5	2.9	
	730733 Stainless Steel Discharge Head Kit - Basic Control	8.1	3.7	
	730534 Steel Discharge Head Kit - Basic Unit & Proximity Sensor - For use in 1 or 3PH applications - Shipped in three cartons: (1) 730462 Basic Steel Head (1) 730505 Control Box - Motor Relay Not Included (1) 730465 Proximity Sensor	7.7	3.5	
	730734 Stainless Steel Discharge Head Kit - Basic Unit & Proximity Sensor	8.5	3.9	

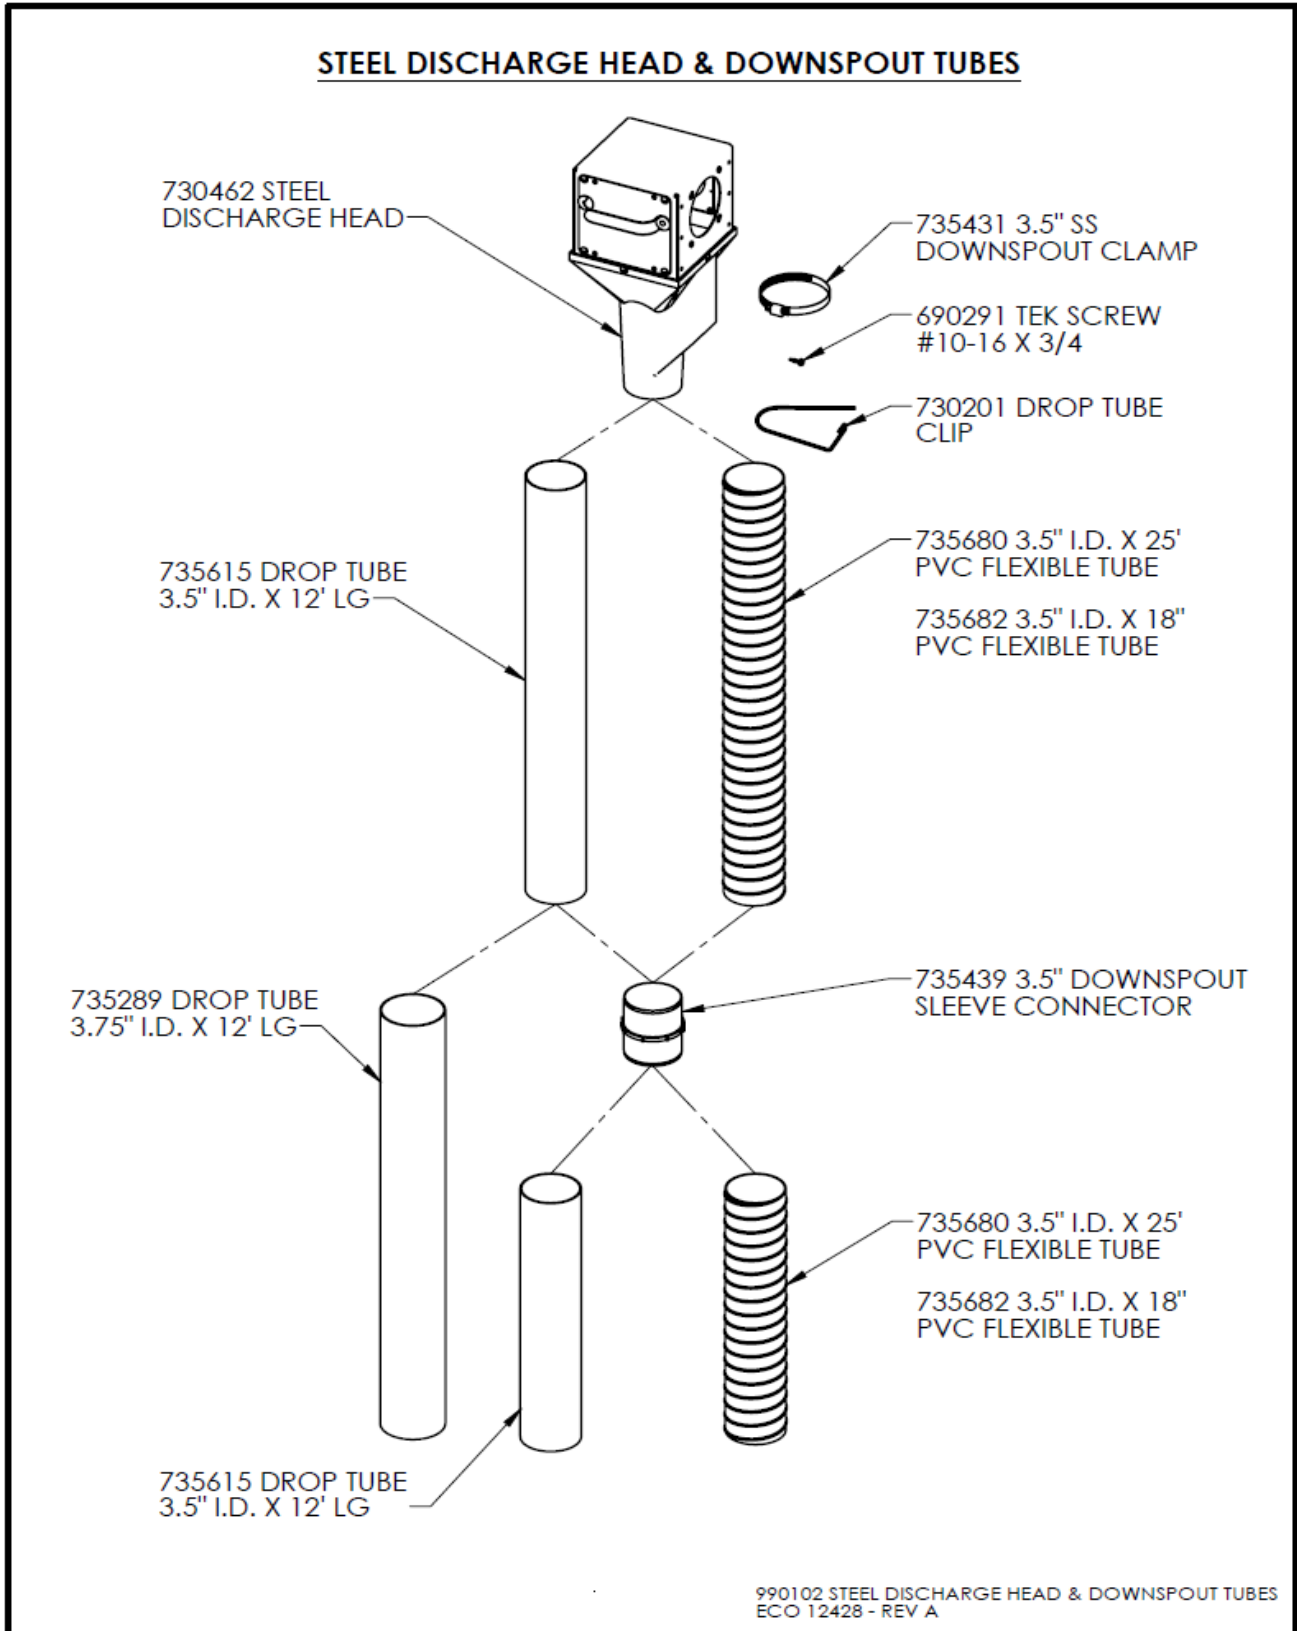

Mechanical back-up safety switch is included with all control options.

Proximity or mechanical feed level sensing may be used with all controls.

- See catalog section 04-26 for feed level sensing options

Customer must provide motor relay for all basic controls

See page 04-22 for more details on the steel discharge head

See page 04-16 for drop tube pricing

FLEXIBLE AUGER FEED DELIVERY SYSTEMS 45 DEGREE ENTRANCE SYSTEMS

500475 or 500575
30 Degree Plastic Upper Boot Transition

For 45° Entrance System Pricing & Component Requirements:

MODEL 720 SYSTEMS - See pages 04-31

MODEL 725 SYSTEMS - See pages 04-35

MODEL 730 SYSTEMS - See page 04-39

MODEL 735 HV SYSTEMS - See page 04-43

MODEL 735 HM SYSTEMS - See page 04-47

FLEXIBLE AUGER FEED DELIVERY SYSTEMS 30 DEGREE ENTRANCE SYSTEMS

For 30° Entrance System Pricing & Component Requirements:

MODEL 720 SYSTEMS - See pages 04-32

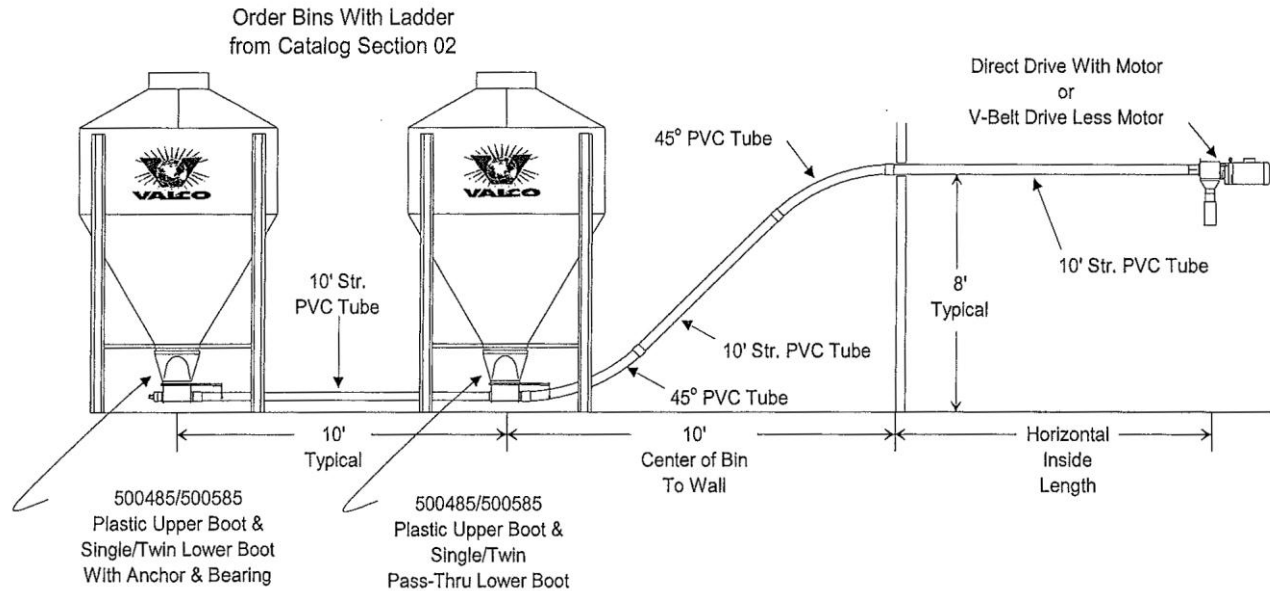

MODEL 725 SYSTEMS - See pages 04-36

MODEL 730 SYSTEMS - See page 04-40

MODEL 735 HV SYSTEMS - See page 04-44

MODEL 735 HM SYSTEMS - See page 04-48

FLEXIBLE AUGER FEED DELIVERY SYSTEMS PASS-THRU SYSTEMS

For Pass-Thru System Pricing & Component Requirements:

MODEL 720 SYSTEMS - See pages 04-33

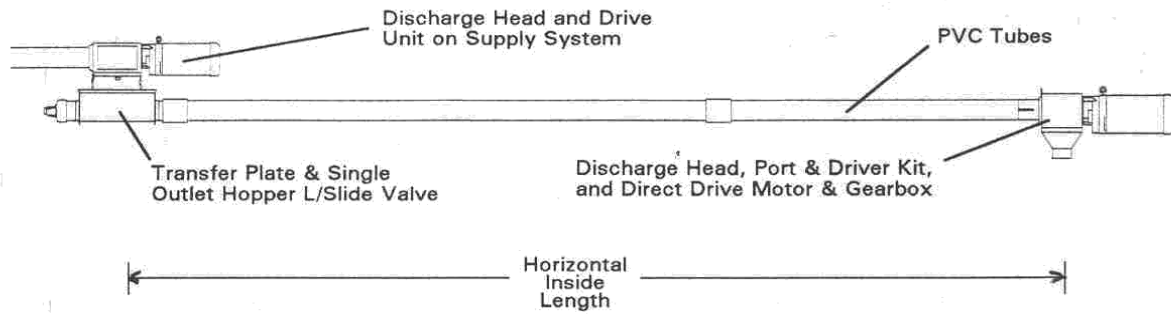

MODEL 725 SYSTEMS - See pages 04-37

MODEL 730 SYSTEMS - See page 04-41

MODEL 735 HV SYSTEMS - See page 04-45

MODEL 735 HM SYSTEMS - See page 04-49

FLEXIBLE AUGER FEED DELIVERY SYSTEMS EXTENDED LENGTH SYSTEMS

For Extended Length System Pricing & Component Requirements:

MODEL 720 SYSTEMS - See pages 04-34

MODEL 725 SYSTEMS - See pages 04-38

MODEL 730 SYSTEMS - See page 04-42

MODEL 735 HV SYSTEMS - See page 04-46

MODEL 735 HM SYSTEMS - See page 04-50

RECOMMENDATION: Select a drive unit with a faster output rpm for the extended system than for the supply (entrance or pass-thru) system.

VAL-CO SYSTEM DISCLAIMER

Recommendations, opinions, or advice given by Val-Co regarding equipment, systems, or installation shall be accepted at the user's own discretion and shall not constitute any warranty or guarantee of such products or their performance. Val-Co assumes no obligation or liability on account of any recommendation, opinions or advice as to the choice, installation, or use of products.

Before installation is made on any product or system, the user has a responsibility to research and comply with all federal, state, and local codes which may apply to the location and installation.

VAL-CO PRODUCT DISCLAIMER

Val-Co products are designed and manufactured to provide reliable performance. Even reliable products may experience occasional failures, due to variance of installation, environment, and the recognized life cycle of a product. Due to the possibility of failure, the user should provide adequate backup systems and an alarm or acknowledge willingness to accept the risk of loss.

WARRANTY

SEE CATALOG SECTION 01 TO REVIEW WARRANTY & DISCLAIMERS

4.25" (108mm) 740 FLEXIBLE AUGER FILL SYSTEMS

Model 740 Motor HP Requirements

Carrying capacities based on feed density of 40 lb./cu.ft

45° Entry System – 8' high max			Straight Extension System		
Max Length (Total Len. of System)	359 rpm (60Hz)	441 rpm (60Hz)	Max Length (Total Len. of System)	359 rpm (60Hz)	441 rpm (60Hz)
50'	0.75	1.0	75'	0.75	1.0
100'	1.0	1.5	135'	1.0	1.5
150'	1.5	2.00	185'	1.5	2.0
180'	2.0	NA	205'	2.0	NA

Application Notes

Length is **TOTAL** length of system

359rpm: HP requirements are given with estimated delivery rate at 220 lb/min maximum.

Can vary down depending on restrictor setting. (Density 40lb/cu. ft.)

441 rpm: HP requirements are given with estimated delivery rate at 250 lb/min maximum

Can vary down depending on restrictor setting. (Density 40lb/cu. ft.)

45° Entry System height restricted to 8'. For each additional ft, reduce max length by 5ft.

Reduce the line length by half for high moisture corn applications (18%-27%)

For all 740 systems:

Each additional 90° of bend, reduce the max length by 30'

Each additional 45° of bend, reduce the max length by 15'

Each additional 30° of bend, reduce the max length by 10'

Each additional 15° of bend, reduce the max length by 5'

Reduce max length by 30' for angles steeper than 45°. Maximum incline angle 60°

For each additional pass-thru bin, reduce the line length by 50'

Maximum recommended run time per day is 4 hours

Maximum recommended particle size 3/16" x 1/2"

Feed moisture content is less than 18%

Steel tubes are 4.25" (108mm) outside diameter

Flexible auger is 3.55" (90mm) outside diameter

4.25" (108mm) 740 FLEXIBLE AUGER FILL SYSTEMS

Model 740 Motor HP Requirements

Carrying capacities based on feed density of 40 lb./cu.ft

Single Pass-Thru 450 Entry System - 8' high max		
Max Length (Total Len. of System)	359 rpm (60Hz) 296 rpm (50Hz)	441 rpm (60Hz) 365 rpm (50Hz)
35'	1.0	1.5
85'	1.5	2.0
115'	2.0	NA

Straight Extension System		
Max Length (Total Len. of System)	359 rpm (60Hz) 296 rpm (50Hz)	441 rpm (60Hz) 365 rpm (50Hz)
75'	0.75	1.0
135'	1.0	1.5
185'	1.5	2.0
205'	2.0	NA

Application Notes

Length is **TOTAL** length of system

359rpm: HP requirements are given with estimated delivery rate at 220 lb/min maximum.

Can vary down depending on restrictor setting. (Density 40lb/cu. ft.)

441 rpm: HP requirements are given with estimated delivery rate at 250 lb/min maximum

Can vary down depending on restrictor setting. (Density 40lb/cu. ft.)

45° Entry System height restricted to 8'. For each additional ft, reduce max length by 5ft.

Reduce the line length by half for high moisture corn applications (18%-27%)

For all 740 systems:

Each additional 90° of bend, reduce the max length by 30'

Each additional 45° of bend, reduce the max length by 15'

Each additional 30° of bend, reduce the max length by 10'

Each additional 15° of bend, reduce the max length by 5'

Reduce max length by 30' for angles steeper than 45°. Maximum incline angle 60°

For each additional pass-thru bin, reduce the line length by 50'

Maximum recommended run time per day is 4 hours

Maximum recommended particle size 3/16" x 1/2"

Feed moisture content is less than 18%

Steel tubes are 4.25" (108mm) outside diameter

Flexible auger is 3.55" (90mm) outside diameter

DISCHARGE HEADS

TO ORDER A COMPLETE DRIVE UNIT

DIRECT DRIVE UNIT

Order a steel (below) discharge head kit and port & driver kit from page 04-59. Also order a direct drive motor & gearbox unit from pages 04-61 thru 04-62.

STEEL DISCHARGE HEAD KITS

CATALOG #		ITEM DESCRIPTION	SHIP WEIGHT		LIST PRICE
			LBS.	KG.	
SINGLE PHASE	740521	Steel Discharge Head Kit - Basic Control - For use in 1 or 3PH applications - Shipped in two cartons: (1) 740466 Basic Steel Head (1) 730505 Control Box - Motor Relay Not Included	12.7	5.8	
	740522	Steel Discharge Head Kit - Basic Unit & Proximity Sensor - For use in 1 or 3PH applications - Shipped in three cartons: (1) 740466 Basic Steel Head (1) 730505 Control Box - Motor Relay Not Included (1) 730465 Proximity Sensor	13.1	5.9	
	740524	Steel Discharge Head Kit - Relay Control - For use in 1PH applications only - Shipped in two cartons: (1) 740466 Basic Steel Head (1) 730501 Control Box - 1PH Motor Relay included	12.8	5.8	
	740525	Steel Discharge Head Kit - Relay Control & Proximity Sensor - For use in 1PH applications only - Shipped in three cartons: (1) 740466 Basic Steel Head (1) 730501 Control Box - 1PH Motor Relay included (1) 730465 Proximity Sensor	13.2	6.0	
3-PHASE	740521	Steel Discharge Head Kit - Basic Control - For use in 1 or 3PH phase applications - Shipped in two cartons: (1) 740466 Basic Steel Head (1) 730505 Control Box - Motor Relay Not Included	12.7	5.8	
	740522	Steel Discharge Head Kit - Basic Unit & Proximity Sensor - For use in 1 or 3PH applications - Shipped in three cartons: (1) 740466 Basic Steel Head (1) 730505 Control Box - Motor Relay Not Included (1) 730465 Proximity Sensor	13.1	5.9	

*Mechanical back-up safety switch is included with all control options.
 Proximity or mechanical feed level sensing may be used with all controls.
 - See catalog section 04-59 for feed level sensing options
 Customer must provide motor relay for all basic controls*
