HEATRITE™ TUBE HEATER COMPONENT PRICING

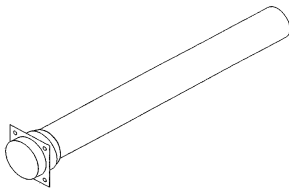

SEE COMPONENT PRICING ON PAGE 40-06 through 40-09

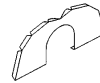

BURNER UNIT
Shown with tube gasket.
Must be installed with the flame
observation window facing down.

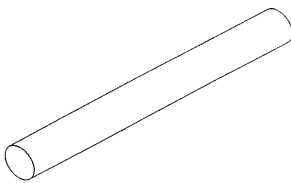

REFLECTOR
Alternate overlap of reflectors.
See instructions for proper overlap
measurement - minimum overlap
is 9" (23cm).

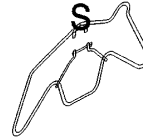

BURNER TUBE
Supplied in 10' length. Burner
tube is always the first tube after
the burner.

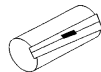

REFLECTOR END CAP
Punch out center section to
accommodate tube. Attach
with provided U-Clips.

TUBE
Supplied in 10' length. Does not
attached to burner.

**TUBE & REFLECTOR
HANGER WITH CLAMP**
Position this hanger no more
than 4" (10cm) away from the
burner unit. Suspend from "S"
hook.

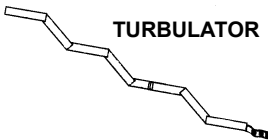

COUPLER
Used for tube to tube
connections

VENT ADAPTER
Adapter is used to connect the
last heat exchange tube to the
vent system. Install adapter with
seam on top.

TUBE & REFLECTOR HANGER
Suspend the system from these
hangers. Minimum of one required
per 10' tube. Suspend from "S"
hook.

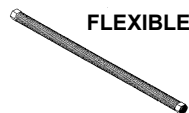

TURBULATOR

VENT SLEEVE

REFLECTOR SUPPORT PACKAGE
One required at every reflector
overlap. The support closest to the
burner and every other support after
should have the screws loosened
approximately 1/16" (2mm) to allow for
reflector slippage.

FLEXIBLE BOOT

FLEXIBLE GAS LINE
